

Vaccines

Anthony M. Antonacci, NMD, CSCS, DC, FASBE

“If you want to be kind, you will call vaccines an unproven remedy. If you want to be accurate, you will call the people who give vaccines, quacks.”

-Robert S. Mendelsohn, M.D.

“The greatest threat of childhood diseases lie in the dangerous and ineffectual efforts made to prevent them through mass immunization.... There is no convincing scientific evidence that mass inoculations can be credited with eliminating any childhood disease (to include POLIO)”

-Robert S. Mendelsohn, M.D.

“I would consider the risks associated with measles vaccination unacceptable even if there were convincing evidence that the vaccine works. There isn't. While there has been a decline in the incidence of the disease, it began long before the vaccine was introduced.”

-Robert S. Mendelsohn, M.D.

80% of all children that contract childhood disease like measles have been fully vaccinated.

You were provided with a very effective IMMUNE SYSTEM. Imagine that. A system designed to protect you from bugs, viruses, illness etc.

Here is a novel idea, how about instead of destroying it with a poor lifestyle to include terrible nutrition or lack thereof, pharmaceutical drugging you to death, no exercise etc. , why don't you focus on building and maintaining a strong immune system?

Whether you have children or not, you are not “immune” from the following discussion. The issue of vaccines is not simply about children any longer.

Paul Offit, MD, often called, “For Profit” Offit and/or “Doctor of Vaccine Profit” is the Chief of Infectious Diseases at University of Pennsylvania Children’s Hospital. He is the multi-millionaire patent holder of the Rotateq vaccine. That vaccine has made him over \$10,000,000 alone. Here is the troubling part. His rotavirus vaccine via Merck pharmaceuticals, which he is a paid spokesperson for (conflict of interest?), has been the direct cause of intussusception and the subsequent deaths of thousands of infants globally. Intussusception is where part of the intestine has invaginated into another section of the intestine much like parts of a collapsible telescope sliding into one another. Sounds like a day at the beach, huh? Painful is an understatement. And that little infant cannot tell you what they feel, they simply scream uncontrollably for hours while your pediatrician frequently mis-diagnoses it as the flu until it is too late and they die.

Due to the numerous deaths, his vaccine was pulled off the market by the FDA who first fast tracked approved it. 5 years later he re-named it, the FDA approved it and the exact same vaccine that killed thousands of children is back on the market today and in your child’s arm. He has been handed down Congressional reprimands for conflict of interest, however because of the extremely powerful pharmaceutical lobbyists and the control they have over our politicians and judges which are all bought and paid for, his vaccine, which he terms, “a beautiful vaccine”

remains in play, regrettably. It appears that Offit considers the death of your 3 month old, beautiful.

He once said, “a babies immune system is capable of handling 1000 vaccines at one time”. Do you think your immune system is capable of handling 1000 different viruses in one sitting, let alone your 2-month old infant? Try it and see what happens. The documented historical damage of the trivalent MMR and DPT vaccines pretty much, alone, illustrate the delusion of Offit’s paid advertisement statement. And that is only 6 vaccines. “You only have 994 more to go today, mom.” “Don’t be concerned with the convulsions, rash, vomiting, diarrhea, 110 fever, screaming, intractable seizures and eyes rolling back in the head.” “Those are to be expected and if they don’t go away within 72 hours, give the little tike some Advil and call me in the morning from the morgue.” I understand you cannot grasp the strength of that, because you have not seen and thoroughly researched what I have.

Diarrhea is one of the leading child killers in the world. The WHO, World Health Organization, estimates 750,000 a year. That is the story. And the story also contains the little known fact that the majority of those deaths occur in countries like Sudan, Angola, Ghana, Rwanda, Moldova, Yemen, Tanzania, Haiti, etc. Are you getting the picture? How many children die of diarrhea or rotavirus in the USA? Rarely. Very rarely with a capital R. So, if you did not get the picture, allow me to illustrate it for you. These are countries where water quality doesn’t even exist. Hold up a minute. Let me be more clear. These are countries where water is scarce and clean water in the communities where these children are dying is non-existent. These are countries that barely have any sanitation or proper hygiene practices. So, these are children that live in feces infected homes and communities and drink brown human and animal feces laden water out of puddles in the dirt streets because they are thirsty. As a result they are being infected with not only rotavirus but a host of other diseases as well.

Now, The WHO, not to be mistaken with the rock band the WHO, has a Strategic Advisory Group of Experts (SAGE). Get it “Sage”? So clever, huh? Here is what the SAGE experts said the WHO needs to do to control rotavirus and diarrhea deaths, who by the way consult heavily with Bill Gates, who by the way donates heavily to GAVI vaccine alliance who by the way uses that money to get vaccines into countries that cannot afford vaccines because of the skyrocketing costs of vaccines, like Angola’s vaccine bill for this year will increase by 1500%:

“In the context of a comprehensive diarrheal disease control strategy, we strongly emphasize the importance of providing, First and Foremost, Improvement of Water Quality, Hygiene, Sanitation, Oral Rehydration Solutions, Nutritional supplementation and overall improved case management.”

There you have it. The WHO’s own experts, the Sages if you will, the Avatars, the Savants, are advocating for clean water and sanitation first. Therein lies the problem. But hey, guess what? Clean water and sanitation doesn’t make any money. Now, vaccines on the other hand, make a bunch of money and I mean a bunch. NO, really.....a boat load of money that you cannot even imagine. A 1500% increase in vaccine costs in one year? By the way, that is since the Affordable Care Act. Imagine how that works. President Obama’s largest campaign contributor, the Pharmaceutical Industry which helped him be selected by the powers to be and re-selected is allowed to write the Act and then gets handsomely awarded by jamming the world with higher drug costs especially with vaccines and profits soar for investors and President Obama becomes a back door millionaire. Oh, how I love to watch American democracy at work “for the people and children” of course.

Here is how it really works, the countries cannot afford it, so GAVI goes out and gets the money from Eugenacists like Bill Gates under the guise of humanitarian efforts. As a result Merck and GSK, the vaccine makers, make a bunch of money, GAVI execs still get to fly around the world first class and get paid big salaries and Gates acquires more power and global influence.

Getting clean water and improving sanitation is not difficult for these countries and would be much cheaper and affordable and beneficial for their communities, however their governments in collusion with our government run by Merck, GSK, et al keep pushing the vaccines and everyone laughs all the way to the bank as these children keep dying on a daily basis. That is how it works and if you think for one moment Bill & Melinda Gates and Paul Offit care about these children, think again. A nice bedtime story, however what is going on behind the scenes to include the WHO is not very pretty. Wherever Bill Gates is, you can be rest assured there is a population control agenda.

Talk to parents whose children have died after vaccination, like I have. May I suggest watching **“For The Greater Good”** and **“Bought”** as they will assist in grasping and understanding what I am attempting to teach. Those documentaries along with staying on NVIC.org e-mail list will be adequate to get you started on a journey you have no choice but to engage in. And if you get adventuresome, YouTube Andrew Wakefield, MD and listen to him speak or read his book, Callous Disregard, not the pharmaceutical hit men that attempted to quiet him or the courtesan Offit. Learn the truth, not the deceit that has been toxically vomited up to you.

There is a reason all disease processes are on the rise in the U.S. and the indiscriminate over use of vaccines, for pure profit, is just one of the culprits along with chemical infused fake food being made by chemical companies. For the last 30 years, I have attended vaccine conferences and sat with parents whose children have died or been permanently damaged by the indiscriminate use of vaccines. Has your pediatrician done that? And I have sat and spoken with independent vaccine researchers on the issue of vaccines, not bought and paid for university professors who sell their souls for the all important pharmaceutical grant money so that they may attain their tenure and status. This is how it works, Merck, GSK, et all goes to Professor Ima Phorsail, PhD at Courtesan University and they say, “here is a new vaccine, do the efficacy research and oh, by the way, here is the result we “want” from your “research” and here is the envelope with enough money for you to still play tenured professor and not have to teach for the next five years. And maybe, if you really “do the right thing for us”, we just might have a paid seat on our board for you.”

Vaccines have never been proven to be safe or effective, by any study, they certainly do not provide immunity hence should never be referred to as Immunizations and are not the reason polio, diphtheria, smallpox, measles, pertussis, tetanus, etc. declined. If vaccines provided immunity then why do they need booster shots well into adult years?

It is about better public and personal hygiene, clean water supplies, unadulterated clean whole food, **improved sanitation** and education. That is precisely why those diseases declined, not because of vaccines. Please investigate **TheDoctorWithin.com** and order and read **Dr. Tim Oshea’s book, “Vaccination is not Immunization”**. Polio was well on its way downward prior to the polio vaccine being introduced. As was every other one of these diseases you falsely fear because they have gotten inside your head and lied to you.

If you took the time to learn what really is in a vaccine you would look at your pediatrician and say, “drop the needle and step away from my child, turn around, get on your knees and place your hands on your head where I can see them”.

Just in case you think I am trying to be funny, I am not. There is nothing funny about the issue of vaccines. This is a very serious matter that is causing the maiming of our children, at a rapid pace and you are buying into it with your blatant ignorance and blind faith in an Allopathic MD system that has actually, historically, caused more harm than good.

Vaccines contain toxic illness causing viruses as well as the following surprises:

Aluminum

Mercury (banned in most childhood vaccines)

Formaldehyde...

But wait, wait there's more, friends.... If you order today you also get the, all popular,

Glycol ether (paint solvent)

Bovine cow serum

Monosodium glutamate

The documented neurotoxin polysorbate 80

Chicken Embryo and/or Monkey Kidney

Aborted Human Fetal cells (you are injecting another human into your child's body and you don't think that will cause health issues down the road?)

Ask your dedicated Allopathic pediatrician if they know what is in a vaccine, now that you kind of have somewhat of an idea? Your answer should be quite enlightening.

And now the Allopaths are recommending vaccinations for women during pregnancy because the “immunity has worn off”. What? They suggest pregnant women do not eat mercury laden wild caught fish (by the way that mercury is cleared from the body unlike the mercury in vaccines and dental fillings), do not drink alcohol or smoke however they will inject mercury and formaldehyde directly into their bloodstream, which will affect the fetus. Their new recommendation is not rooted in scientific evidence based research. It is based in monetary objectives and is the most egregious approach, next to prophylactic mastectomies, in directly harming women and their babies and creating more illness in our society. By the way, the Allopathic MD will tell the mother that their vaccines have worn off and they need more. Well, hold up a minute, here. I thought vaccines provided immunity? They never told me the “so called immunity” from vaccines wore off. Did they ever tell you? And I never learned that in school. Funny, huh? They tell you vaccines provide immunity and strengthen the “Herd” and then the tell you years later that the immunity wore off? Here is the real funny part. Immunity from the natural wild strains of these virus's never wears off. Never. Gosh, how cool is that?

Do not get vaccinated during pregnancy, never get a flu shot at any time and do not vaccinate your children with the current recommended schedules and never prior to two years old. And never if their underdeveloped immune systems are compromised with as little as a sniffle or a slight fever. That used to be the pediatric standard of care prior to pharmaceutical companies your politicians and the AMA figured out the significant monetary gains from the indiscriminate use of vaccines.

I would suggest reading “**The Vaccine Book**” by **Robert Sears, MD** if you choose to vaccinate with an alternative schedule. Dr. Sears is an Allopathic Pediatrician that has taken the time and

respect to listen to parents concerns and created alternative vaccine schedules that you, the parent, can feel more comfortable with. He, as Dr. Andrew Wakefield, are courageous Allopathic Physicians because they have the testicular fortitude to speak out against their misguided profession and go against the grain of the monetary monopoly driven AMA and pharmaceutical cartels and they deeply care about humanity as they are ostracized by their own profession because they place your children before money.

Keep in mind, the Swine Flu Vaccine caused more deaths and disease than the flu itself. The flu vaccine, to this day, causes more illness than the wild strain virus itself. The flu does not kill. The data is skewed to hide that it is pneumonia that kills, not the flu. There is serious money in vaccines and you are buying into the lies in the face of truth. You are subjecting your children and yourselves to poison and neurological damage for life due to your blind faith in your Allopathic pediatrician who may mean well however is seriously misguided.

The CDC came out in 2014, once again, and admitted that the flu shot is not effective, however they still recommend getting it. Which actually is a yearly occurrence because it never works. Does that make any sense to anyone? You are injecting the aforementioned poisons into your body and worse the body of a 2 month year old baby and they admit they do not work. Critical thought is a beautiful thing to waste.

You can now get a flu shot at Ralph's Grocery. Do you they do that in the meat department from the butcher? I recently asked a Rite-Aid pharmacist if she knew precisely what is in a vaccine. She did not nor does your pediatrician.

I did not vaccinate my children nor do I ever recommend anyone vaccinate for any reason unless they fully educate themselves on the issue and make an informed decision with their consent. However, that was after many years of intensive education, historical research and clinical experience with this issue, specifically, that allowed us to make an informed decision, as I was their pediatrician. There is a reason Dr. Oz and many pediatricians do not vaccinate their children. It might be a reasonable suggestion for you to be as informed as they are and not blindly listen to your Allopathic pediatrician or allow them to brow beat you into obeying and conforming to their tyranny while placing your child at risk of injury.

POLIO

90% of those who carry the poliovirus never have any symptoms and only a fraction of 1% of cases ended up with long-term paralysis. So much for all the stark images of children with leg braces and crutches and folks in iron lungs.

Jonas Salk's Polio Vaccine lasted only 17 months because of all the deaths and paralysis it caused. It was brought back on the market and remains in play today along with the Sabin oral vaccine. Here is what Albert Sabin, MD, the inventor of the Sabin Polio vaccine, had to say 30 years later:

“Official data has shown that the large scale vaccinations undertaken in the US have failed to obtain any significant improvement of the diseases for which they were supposed to provide immunization. In essence it was a failure”

The Polio vaccine still remains a threat and is unsafe, today. The recent polio outbreak in Syria that the WHO, World Health Organization, has admitted has spread from Pakistan, **is not from the wild strain**. It is from the mass vaccination program the US initiated in Pakistan in the last

few years. **The polio outbreak in Pakistan and spread is from the vaccine itself.** That is why our government controlled mainstream media veils you from seeing the mass protests in the streets from Pakistan parents whose children are being maimed with US vaccines that was not occurring prior to the mass vaccination program. Pakistan has an out of control population explosion problem, which Bill Gates, et al decided needed to be curbed through vaccines. Don't think so? Then YouTube Bill Gates, TED conference "using vaccines to control population growth", and listen very closely to his subtle comment regarding the use of vaccines to control population growth. And you thought they saved lives, as they told you, huh?

There is a reason Diabetes is on the rise, cancer is on the rise, autoimmune neurological inflammatory disease is on the rise as well as others. I attended a breakout lecture from an independent vaccine researcher at my first vaccine conference in Washington DC, almost 30 years ago, and he cautioned that we would see all these diseases rise, particularly cancer, in the next 25 years due to the cumulative effect of vaccine overload and the fact that many of us that were vaccinated prior to 1964 are carrying the SV40 virus which has been linked to cancer. And here we are. This is what is called the age of the Vaccine Damaged Syndrome. A recent groundbreaking peer-reviewed study published in the Journal of Molecular and Genetic Medicine support that vaccine researcher's observation and highlights the consequences of this vaccine induced immune system overload.

Bart Classen, MD, an immunologist, investigated the current epidemic of inflammatory diseases among children. Cases of type 1 and type 2 diabetes, metabolic syndrome, autoimmune disorders, asthma and food allergies have been steadily increasing over the years, corresponding directly with an increase in the number of vaccines on the official vaccination schedule for children.

Dr. Classen... "When too many vaccines are given at once or within a very short period of time, the body may experience an immune overload resulting in an inflammatory response. We have been publishing for years that vaccines are causing an epidemic of inflammatory diseases including diabetes, obesity and autism. However, the number of vaccines given to children has continued to rise to a point where we have reached a state of immune overload in roughly the majority of young U.S. children."

Did he say vaccines cause Autism? And he is not the only researcher saying the exact same thing, is he? Remember Andrew Wakefield, MD? If they know vaccines cause autism thru their research, why does the government controlled media lie to you and tell you it does not? And why do Allopathic Pediatricians tell you vaccines do not cause autism when the research proves it does? And why do they skew the results of tests and taint the blood of patients with antibodies to fake a result? And the best part...you believe them at the expense of your child. Because you actually believe that polio was eradicated by vaccines and you fear polio. When was the last time you ever saw a case of polio in this country, from the wild strain?

Dr. Classen... "The process of over stimulating the immune system time and time again (with vaccines) increases the risk of inflammatory diseases like auto-immune diseases."

The effectiveness of the MMR vaccine in preventing mumps is-according to Dr. William Schaffer, a pro-vaccine researcher at Vanderbilt University----

"NOT SO GOOD"

A CDC study of 2009-2010 mumps outbreak in the northeast, US found that 80% of those sickened in the 2009 “outbreak” had been fully vaccinated. And that is the case with most of these so-called “outbreaks”. All government “studies” will always blame outbreaks on low vaccination rates instead of low vaccine effectiveness. Vaccines are not effective and vaccines are not safe. Please show me the studies, that have not been manipulated by Merck researchers like in 2012 where Merck fabricated a 95% effectiveness rate and defrauded the US government by having them purchase 4 million doses of “mislabeled and misbranded” MMR vaccines which helped spark 2 major outbreaks from the vaccine itself and causing this unprecedented skyrocketing of Autism. Initially the Justice Department refused to pursue criminal charges, however at this writing they are further investigating the case. So big deal. They will fine them a few million dollars and the game keeps being played. And the media continues in berating parents who protect their children from these dangerous vaccines that provide no immunity.

In California, as of July 1, 2016 the only opt out waiver for vaccines is a medical waiver signed by your pediatrician although you would have more luck attempting to convince the Pope to turn Mormon than you will attempting to ask your Allopathic pediatrician to sign a medical waiver. They make most of their money by injecting vaccines and prescribing antibiotics. You figure it out. We lost our personal and religious beliefs waiver because Governor Brown caved in and was paid off handsomely by the powers to be to the demise of our children.

To see if your state offers personal or religious beliefs waivers go to NVIC.org, click on your state, click on waiver, print it, check the personal or religious beliefs waiver and present it to your school. They cannot deny your children admittance.

Los Angeles Times November 24, 2013 exposed that The U.S. government is currently building what is the first government vaccine producing facility in Florida. This is contrary to all recommendations, from government contracted consultants who advised against it and suggested that private pharmaceutical companies are and will be able to keep up with the demands. The current administration is quietly moving funds that were earmarked for military body armor and placing it into the building of the facility and an unprecedented march into mass research and manufacturing of current and new vaccines. Why do you think that is? I know, however if I told you, you truly would not believe me because I teach truth and you can no longer hear it or feel it because you have been lied to so much, you only believe the lies. You better remove the veil of deceit and start paying real close attention to the issue of vaccines.

There is no scientific evidence to support the notion that Vaccines are protecting your children or you or the “Herd” from any disease or provide immunity. Show me the non-skewed results and I will gladly change my position. Regrettably, the supporting evidence does not exist.

Now, you can go figure out why they are doing what they are doing. You will, soon, be needing vaccines for all sorts of things like gaining employment, acquiring health insurance, acquiring passports, drivers licenses and much, much more. I have already met nurses who have been fired, in hospitals, because they refused to be vaccinated.

This is a very big money game being played with your child’s life and yours. This is where the big boys play with serious money on the table and eugenic agendas and they intend to impose it on you. And they are, as we speak. They don’t care about your health or the health of the “Herd”. They know vaccines are not safe, they know vaccines cause short-term damage and

long-term serious illness and they don't vaccinate themselves or their own children. Now, please go ask Dr. Oz, America's Doctor, why he does not vaccinate his children. Better yet, ask Bill Gates and Paul Offit to inject themselves on national television with vaccines and make sure it is just not saline and watch what will happen. They won't.

You can download the Vaccine Safety Voucher to be signed by your pediatrician upon presenting your child or yourself to them. In 30 years of practice I have never seen one signed by any Allopathic pediatrician. In fact, the majority have dismissed the patient once the voucher is presented to them. Why is that do you think? If they are safe and effective why would your Allopathic pediatrician not sign it with vigor?

Here is the real funny part, ready?

Please google the following: 'VAERS'. That would be the Vaccine Adverse Event Reporting System born out of the National Childhood Vaccine Injury Act of 1986. It is a National Vaccine Safety Surveillance Program brought into effect by President Ronald Regan. To date, several billions of dollars have been paid to parents of vaccine-damaged children or ones that died from vaccine administration. Now here is the question for you, if vaccines are safe and effective why is there a need for a Federal Vaccine Adverse Event Reporting System? If you go to the FDA website you will see them tell you that most adverse reports are from a simple fever. Does the Federal Government shell out Billions of dollars for simple fevers?

In fact, the vaccine manufacturers were being sued so much that Donna Shalala, then the front person to protect the pharmaceutical companies for President Clinton protected them from suits because they were threatening to stop producing vaccines. Since then, they have come out with a vaccine for everything from the common cold to a hang nail and have drastically increased the amount of vaccines our children are getting from 2 months old. Currently, the pharmaceutical companies are President Obama's largest campaign contributors and the Affordable Care Act commonly called Obamacare has been the largest windfall for the drug companies ever in the history of the US. Mainly, because they along with the Insurance Industry wrote the Act. Gosh isn't wonderful to watch American Politics at play? It might appear, to the naked eye, that the only Immunity being conferred from Vaccines is upon the Pharmaceutical Companies.

Now let's take a very brief journey into the skyrocketing costs of vaccines. According to Doctors without Borders, a basic vaccination package cost, 67cents in 2001. When was the last time you saw anything in 'cents'? By 2014, the bill grew to \$32 for boys and \$46 for girls due to the added HPV vaccine Gardasil which they are advising for boys as well. For girls, that is a jaw dropping 68 fold increase.

Poorer countries are being hit the hardest. In Indonesia for example, their vaccine costs will rise from 2 million in 2012 to an estimated 35 million, just 6 years later in 2018, only 3 years away. Are you starting to think you are in the wrong business? Even the blossoming Cannabis industry cannot boast these profits.

Imagine having a business that provided absolutely no benefit whatsoever, created more illness and death and you got paid billions and used very influential people to peddle it.

**“The Further a Society Drifts From the Truth, the More it Will Hate
Those Who Speak It” *George Orwell***

We have not strayed from truth, we have obliterated it

Vaya Con Dios
