

Chasing Symptoms With Chemotherapy To Your Death

Dr. Anthony M. Antonacci

“The Power that made the body will Heal the body”

Dr. B.J. Palmer, DC

I was recently watching an interview with Ishra with questions being asked by an MD allopathic doctor. Ishra was explaining the well-known, well-documented innate ability of the body to heal itself. This is not magic; this is basic evidenced based physiological science. And the MD admitted she was never taught, in medical school, the ability of the body to heal itself and this was all new to her in 2019.

Consider the following scenario...you fall and you misplaced your “I have fallen and I cannot get up 911 push button alarm,” you have a superficial abrasion to your knee and your elbow and your cheek. You ooze a bit of red stuff called blood, however you do not need sutures and the paramedics are not on their way because you misplaced your “alarm button”. What to do? Oh gosh, what on earth do you do? You cannot drive to the ER because your wayward stoner kid borrowed your '69 VW bug that runs on 3 cylinders and did not come home last night. What on earth do you do?

Well, you slowly stand up, go to the nearest sink or horse trough, use water to clean the abrasion and apply a Band-Aid to cover and protect the area. Crisis over and you saved \$1,100, which is the price tag for a local LAFD paramedic taxi to the ER. What a savings! For the mere cost of 3 Band-Aids, about 3 cents, you actually took care of yourself. Amazing, isn't it?

Now, comes the best part. In about a day or two you remove the Band-Aids and allow the Innate healing ability of your body that was put in place by the power that made you, God, to heal the wounds. And here is the really awesome part...in about a mere few weeks you don't even remember or can see where you injured yourself because it is completely healed with no evidence of the initial injury. Wow, the Celestial Design Committee that put you together did a pretty good job with the Innate Ability of the Body to Heal Itself, given the right proper tools, didn't they?

You had no reason to CHASE THE SYMPTOMS of your injury with intervention other than your own self-care, did you?

THEN WHY ON EARTH DO YOU CHASE SYMPTOMS WITH MISGUIDED ALLOPATHIC CHEMOTHERAPY POISON WHEN YOU HAVE THE SYMPTOM OF CANCER?

CANCER IS NOT A DISEASE. IT IS A SYMPTOM OF A SERIOUS SYSTEMIC PROBLEM IN YOUR BODY CREATED BY YOU, NOT BY GENETICS.

And then because of your irresponsibility and blatant laziness you allow some misguided well-meaning oncologist to chase the symptom of cancer with chemotherapy, and radiation...dose after dose after dose after dose after dose. When the body cannot sustain that much chemotherapy. Oh sure the "tumor" starts to shrink for a short time and then you succumb to the overdose of chemotherapy poison as you and Dr. Nightingale, that gave you a cell phone number, which is often not their personal cell phone number, chase the symptom of the "tumor".

You died of the chemotherapy toxicity overdose, not the cancer.

Don't be a fool to what the industrial chemotherapy cottage complex wants you to believe. They killed you and your loved one, not the cancer. And Dr. Nightingale made a whole bunch of money and he/she knows it because if you did not have really good insurance that paid \$30,000 each month on your back, he/she would likely not have ordered it. Not on Obama's plan would he have ever ordered it. Because Obama's "Affordable" plan would never pay for it.

As you or your loved one now lies unconscious in a coma on hospice waiting for the pearly gates to open as you are lying in a very long line, now what?

Never ever allow them to replace the Innate Healing presence of God within you with the presence of
FEAR.

Why do you Christians do precisely that? Why do you praise the Lord on Sundays and then lower yourselves to the poison of the MD allopathic disease management moneymaking system Monday thru Saturday?

Chemotherapy is Satan's Poison

There you have it. I have said it and I know I will lose some folks and others will think I have gone off the cliff. However, you have NOT SEEN what I have in 35 years of practice and you do not know my father's cancer journey or mine. So some of you remain ignorant in thinking and believing Chemotherapy is a healing medicine. It is a documented BIOHAZARD poison in the lineage of WWI mustard gas that murdered millions as it does to this day.

I remain at HIS feet in the absolute knowing of HIS Power and HIS Grace and HIS Healing and what I have to do in taking responsibility to assist God in my healing. It is called discipline.
